## INTRODUCTORY.

WITH the New Year comes the new CAMBRIDGE CITY DIRECTORY for 1892, No. 41 in the series. It is our intention in the future to issue the work the first of January, although, by so doing, we have to omit the appointed officers of the City Government. A new feature has also been adopted this year which we think will meet with general favor: instead of repeating the same surname many times, we simply print it at the head of the list. In the future, as in the past, we shall avail ourselves of every opportunity, and shall spare no expense, to make the CAMBRIDGE CITY DIRECTORY first-class in every respect.

We express our thanks to all who have aided us in our work.

The following synopsis is appended:

Names in 1892	.	.	.	31,694
" " 1891	.	.	.	30,763
				<hr/>
Increase	.	.	.	931

Respectfully,

W. A. GREENOUGH & CO.,  
*Compilers, Printers and Publishers.*

## PLEASE NOTE THIS.

The reason why PACH BROTHERS do so large a buisness is because it is a positive pleasure to even step into their attractive studio. which is situated in the most beautiful part of Cambridge, just below Harvard Square, in close proximity to the college buildings. All patrons are sure of being courteously attended to. Mr. Tupper, the Manager, is one of the most self-possessed men in the business; his assistants are affable; there is no disorder nor waiting for unnecessary delays; the work is out when promised, and the charges much more reasonabie than in Boston.

# IMPROVED CARPET CLEANING.

281 Washington St., cor. Hawkins, near Union Sq.,

**SOMERVILLE.**

*CARPETS taken up, cleansed from dust and moths, and relaid at short notice.*

*MATTRESSES made to order and old ones made over.*

*FEATHERS purified by our Steam and Cold Blast Process.*

*TICKS washed and new ones supplied, Carpets Linings for sale.*

A. F. CHAPPELL & Co., of 281 Washington street, Somerville, have taken up, cleansed and relaid the carpets in my house. The cleaning has been done in a careful thorough and perfectly satisfactory manner. Broken seams have been neatly repaired. The carpets in their places once more have the appearance almost of new ones. Moreover the work was all done in the briefest possible time. This is the ideal method of house cleaning, and I recommend them to all who have need of such services.

ELMER H. CAPEN, President of Tufts College.

April 10, 1891.

A. F. CHAPPELL & Co.: Dear sir—I have found your Carpet Cleaning, Fitting, Sewing and Laying satisfactory in every respect, and would cordially recommend you to all who desire good work and prompt service. Yours, J. S. PAINE, Residence, 8 Dana St., Cambridge. Paine's Furniture House.

# Monson Maine Slate Co.,

QUARRIERS, AND MANUFACTURERS OF

## Monson Maine Unfading Black Roofing Slates,

Floor Tiles, Register Frames, Slabs, Counter Tops, Refrigerator Shelves, Hearths, Chimney Tops, Headstones, Garden Borders and Walks, Grave Linings and Covers, Green House Shelves, Urinals, Sinks, Wash Tubs, Vestibule Floors, Black Boards, Base Boards, Electric Switch Boards, and Slate Work of Every Description.

Please notice herewith the prices, per square of *Monson, Maine, Unfading Black Roof Slates, on cars at our Quarries in MONSON, MAINE.*

### Standard of Qualities for Monson, Me., Slates.

**Selected No. 1.**—No slate to be less than *full six thirty-seconds* of an inch in thickness. All corners must be cut square and full, and Both Surfaces Level and Smooth.

**Standard Thick.**—No slate to be less than *full six thirty-seconds* of an inch in thickness. One surface must be Level, all corners cut square and full.

**No. 2.**—One surface must be level, all corners cut square and full.

*Never allow the holes in roof slates to be punched, because punching badly damages the slate.*

*Architects should always specify that the holes shall be bored and countersunk, and thereby avoid the injury to the slate from percussion.*

Slate tiles and roof slates in any size and thickness, with edges sawn and holes bored and countersunk, will be furnished upon descriptive specifications.

*To avoid misunderstanding, the required thickness of roof slates should be particularly specified by the architect.* This is more highly important than to specify the size of slates to be used.

Monson slates are exceedingly valuable to buildings because of unfading color, great flexibility, superior toughness, uniformity in thickness, and general smoothness of surface.

Upon request, prices will be quoted, deliverable at any railroad station in America.

Samples promptly furnished upon application.

*All slates bored and countersunk free of charge.*

### Instructions to Key Holders.

Alarms to be given from the box nearest the location of the fire.

Do not give an alarm for a fire seen at a distance, unless assistance is called for.

To give an alarm, open the door, pull the hook to the bottom of the slot once, and let go. Each box contains a small bell, which, if heard before you pull, indicates that an alarm has been previously given, and by listening at the box, you will learn the number of the box, from which the alarm was given, but in no case will you pull the box while the alarm is striking. After giving the alarm, remain at the box, so as to direct the firemen to the fire. Be sure that you lock the box before leaving it.

Citizens are requested to inform themselves where keys to the signal boxes are kept, signs suitably inscribed being placed over each box, giving the requisite information.

### Instructions to Firemen.

First alarm will be given by striking *three* or more rounds.

Second alarm will be given by repeating the first.

General alarm will be given by striking *three blows* on the gongs and bells.

In cases where hook and ladder companies only are wanted, the call will be given by striking *five blows*.

Companies not required to respond to first or second alarms will be notified of the extinguishment of a fire by *two blows* on the gongs, that their services will not be needed and that orders have been given to "make up." Should an alarm be given from any box while a portion of the department is engaged at a fire, the apparatus not in service will respond.
